

Anhydrous Ammonia Safety for Law Enforcement

DATE, TIME AND LOCATION:

**Thursday, November 13, 2008—9:00 a.m.—11:00 a.m.
Western Illinois Police Training Unit, 1801 Windish Drive, Galesburg IL**

INSTRUCTOR:

**Jenny Poole, Growmark,
Compliance Specialists in Environmental & Regulatory Services**

About the Course:

The theft of anhydrous ammonia is increasing every day in Illinois. This necessary product in the production of Nazi Dope is very dangerous to everyone involved, maker, customer, neighbor and police officer. This will be demonstrated by some anhydrous ammonia being drawn from an actual tank and the effects it has on eyes (represented by grapes) and on exposed skin (represented by meat).

The Farmers Service units have had in place some excellent safety hazard training for farmers concerning anhydrous ammonia. Law enforcement and FS have teamed up to create this new three hour educational and potential life saving training course. This training is also open to fire departments and first responders.

Topics Include:

Anhydrous and the hazards involved in the meth manufacturing process.
Safety concerns in the handling and dealing with anhydrous in general.
What anhydrous ammonia does to human body tissue.
The overall dangers of anhydrous.
Theft deterrence (Crime Prevention)
Lab concerns (Dismantling) - Who do you call?
